

Mid-America Service Solutions Now Available for APS Members

APS is pleased to announce Vizient, the national strategic partner to APS, is extending APS members the opportunity to join aggregation networks to potentially achieve greater savings. That means Mid-America Service Solutions (MSS) is now available for APS members to join.

While there is a fee to join MSS, the savings will produce a return on your investment. Joining MSS will not change your relationship with APS which ensures you will continue to receive exceptional service offered by your APS Client Service Team. As always, our team can assist you in securing the best pricing on medical, surgical and pharmacy products and healthcare services whether you access MSS, our locally negotiated agreements, the national buying power of Vizient.

We encourage you to leverage your APS Client Service Team to tap into deeper savings opportunities and innovative tools that will power better performance and improve care for your organization. Please let us know if you have questions or how we can assist you in achieving greater savings.
